# **Baidu Map Application Demo**

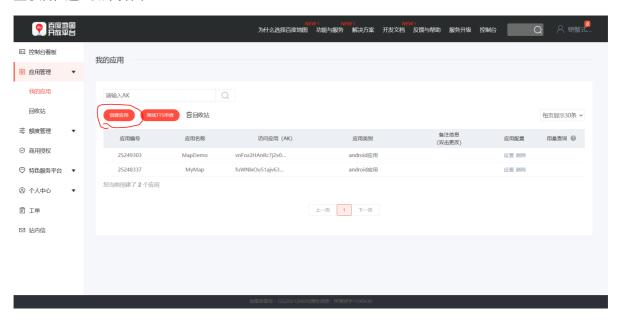

## 一、获取百度地图API KEY

Android地图SDK | 百度地图API SDK (baidu.com)

打开上面的链接,点击获取密钥

登录后,进入如下界面

点击创建应用, 进入如下界面

- 1. 填写应用名称
- 2. 应用类型选为Android SDK
- 3. 填入发布版SHA1
- 4. 填入PackageName
- 5. 点击提交, 进入下个页面

点此处来复制api key

## 二、如何获取SHA1和PackageName

- 1. 按win+r, 打开运行;输入cmd, 敲回车,即可打开cmd
- 2. 在cmd中输入cd .android, 回车
- 3. 输入keytool -List -V -keystore debug.keystore,回车
- 4. 输入密码,默认为android
- 5. 可以看到SHA1,如图

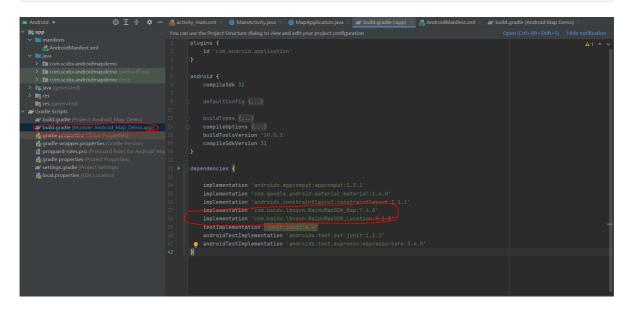

6. 在AndroidManifest.xml里,前几行就能找到packagename

```
<?xml version="1.0" encoding="utf-8"?>
p<manifest xmlns:android="http://schemas.android.com/apk/res/android"
package="com.scxbx.androidmapdemo">
```

## 四、添加依赖

在build.gradle中, dependenceis里, 加入

```
implementation 'com.baidu.lbsyun:BaiduMapSDK_Map:7.4.0'
implementation 'com.baidu.lbsyun:BaiduMapSDK_Location:9.1.8'
```

### 出现以下提示,点击 Sync now

## 五、加入代码

#### 1. 创建MapApplication.java

```
public class MapApplication extends Application {
    @Override
    public void onCreate() {
        super.onCreate();
        SDKInitializer.setCoordType(CoordType.BD09LL);
        SDKInitializer.initialize(this);
    }
}
```

#### 2. 在activity\_main.xml里,删除默认的TextView, 插入以下代码

```
<com.baidu.mapapi.map.MapView
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:id="@+id/bmapView"
    android:clickable="true"/>
```

#### 3. 在MainActivity.xml里,写入以下代码

```
public class MainActivity extends AppCompatActivity {
    private MapView mapView = null;
    @override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        mapView = findViewById(R.id.bmapView);
   }
   @override
    protected void onResume() {
        super.onResume();
        mapView.onResume();
    }
   @override
    protected void onPause() {
        super.onPause();
        mapView.onPause();
    }
   @override
    protected void onDestroy() {
        super.onDestroy();
        mapView.onDestroy();
    }
}
```

#### 5. 在AndroidManifest.xml里,替换为以下代码。

```
<?xml version="1.0" encoding="utf-8"?>
<manifest xmlns:android="http://schemas.android.com/apk/res/android"</pre>
   package="com.scxbx.androidmapdemo">
   <uses-permission android:name="android.permission.INTERNET"/>
   <uses-permission android:name="android.permission.ACCESS_NETWORK_STATE"/>
   <uses-permission android:name="android.permission.READ_EXTERNAL_STORAGE" />
    <uses-permission android:name="android.permission.WRITE_EXTERNAL_STORAGE"/>
   <application
        android:name=".MapApplication"
        android:allowBackup="true"
        android:icon="@mipmap/ic_launcher"
        android:label="@string/app_name"
        android:roundIcon="@mipmap/ic_launcher_round"
        android:supportsRtl="true"
        android:theme="@style/Theme.AndroidMapDemo">
        <meta-data android:name="com.baidu.lbsapi.API_KEY"</pre>
            android:value="vnFoz2HAnRc7j2v0IzLf8CGwBNpTLFQm" />
        <activity
            android:name=".MainActivity"
            android:exported="true">
            <intent-filter>
                <action android:name="android.intent.action.MAIN" />
                <category android:name="android.intent.category.LAUNCHER" />
            </intent-filter>
        </activity>
   </application>
</manifest>
```

#### 注意下面三处代码

```
<uses-permission android:name="android.permission.INTERNET"/>
<uses-permission android:name="android.permission.ACCESS_NETWORK_STATE"/>
<uses-permission android:name="android.permission.READ_EXTERNAL_STORAGE" />
<uses-permission android:name="android.permission.WRITE_EXTERNAL_STORAGE"/>
android:name=".MapApplication"
```

```
<meta-data android:name="com.baidu.lbsapi.API_KEY"
    android:value="vnFoz2HAnRc7j2v0IzLf8CGwBNpTLFQm" />
```

## 六、运行

效果如下图
